

Summer School Support for Students and Educators

The DLC is open for business all summer long! DLC resources can help support summer school students and WASL remediation programs as well as help teachers integrate resources into their summer school curriculum. Teachers can also earn clock hours this summer through the DLC.

In addition to the DLC Library, Teaching Resources, and Online Courses, consider the following specific resources as you plan for summer school.

Credit Recovery Courses and WASL Review

Credit recovery courses allow students to focus on specific areas of a subject that they need to catch up on. We also offer a number of online WASL remediation courses that students can register for. Visit the Online Courses section of our website and check the academic calendar for summer school start dates. Schools must assign a Teacher/Mentor to work with each student taking an online course. Contact Leslie St. Pierre, Assistant Director of Course Support, at (206) 616-5771 or [lstpierr@learningcommons.org](mailto:lstpierre@learningcommons.org) for more information.

School Support

Our trainers are available to help teachers integrate DLC resources into their summer school curriculum. Schedule a spring training to gear up for summer school now, or schedule a training to target resources for a specific session this summer. To request a training, visit the School Support section of our website.

WASL Prep Resources

Both Apex Learning's ClassTools and Internet Academy's ALPs can help students prepare for the WASL by targeting specific skills that they need to work on. The DLC's Mathcasts and ExploreLearning Gizmos also support WASL Prep. For more information, visit the Teaching Resources section of our website.

Professional Development

Visit the Professional Development section of our website to explore a catalog of online workshops, courses, and opportunities to earn clock hours this summer.
