

Improve Student Learning with DLC Resources

Looking for ways to improve student learning?

Online resources are a great way to meet the needs of every student and to encourage students to become more active participants. With the following alignments, helpful resources are just a click away.

Powerful Teaching

www.learningcommons.org/pt

Powerful teaching refers to observable teacher behaviors that lead to improved student achievement, as shown by research-based evidence. DLC resources can help you put all the components of powerful teaching into play, including student-centered learning environments and relevant, real-world connections.

OSPI Initiatives

www.learningcommons.org/ospi

DLC resources and tools closely align with and support many of the current educational initiatives originating from OSPI, such as high school graduation requirements and the Washington State five-year professional development plan.

WASL Prep

www.learningcommons.org/wasl

The DLC offers a variety of resources you can use to help students prep for the WASL, including online curricula, prep courses, and tutorials. Online resources are a great way to personalize learning, which helps individual students master the skills they need to pass the WASL.

Standards Alignment Tool

www.learningcommons.org/educators/tr/

The DLC currently offers a search tool that scans our website for resources that align with Washington state standards.
